http://127.0.0.1:5500/sow/index.html#site-burocratik

I don't know why but this repository isn't updated with my commits, and manifest, and favicon folders, I think I have done it in another repository that is not in my github. Thats why I will put a zip with all my folders and the real and updated index.html and sow.css of my website.

https://github.com/lun-a421/advanced-web-design/blob/main/sow/index.html

I have it but I don't know why it isn't updated in my github repository
